It's Electric! Super Cool Anti-Aging Technology

INTENSE LED PHOTO PULSATION

The light emitting diodes (LED) do everything from energizing skin cells to deactivating certain enzymes that break down collagen. Red light is used to combat anti-aging and blue light kills p-acne bacteria. This facial treatment includes an enzyme or peel exfoliation.

60min/\$135

O₂ INTRACEUTICALS OXYGEN TREATMENT

This treatment reduces the appearance of fine lines, improves skin tone and provides an instant firming by using hyperbaric technology to saturate the skin with oxygen and infuse it with a rejuvenating hyaluronic serum, leaving your skin completely hydrated, plumped and glowing.

60min/\$155

MICRO- DERMABRASION

This highly effective treatment is one of the most sought after means to achieve younger, healthier skin. Microdermabrasion smooths away fine lines, decongests the skin and stimulates the production of collagen and elastin.
